Notes from Brad

Words of Encouragement, Optimism & Insight by Brad Barber, Co-Founder of Cabin Coffee Company and Founder of United To Serve with Passion and Purpose

How about today and going forward add a little more politeness in everything you do. Say a kind word, clean the dishes, carry something for someone, provide a loving hug, open the door for someone. Politeness will warm your heart and the more you are polite the more joyful you become as well as the others around you. After all, don't we want everyone to be polite and experience a joyful heart?

Good news and good deeds warm my heart, put a sparkle in my eye and a big smile on my face! Why? It is a testament that there are many in this world that care and have the desire to serve adding value to one another. Not trying to divide and create chaos, what will you do the rest of your life to warm hearts, put a sparkle in people's eye and a big smile on their face? Let's all band together and weigh more heavily on the good news/deeds and stomp out the bad?

Let's all be contributors and great stewards for this Country. This universe is a better place because a few of our ancestors left places where they were suppressed by religious and government leaders that told people how to live and worship. Know this, they risked not only their own lives but their children's lives not even knowing if they would ever reach America. That is how much they cherished freedom. We have choices now, we may not have choices in the near future, if and when we believe government can take care of us better than we can as citizens. Question, are we going to take the lead or are we going to allow our government to make all the decisions? We must hold true to our core principles, morals and values that are within the Constitution or we will fall short of protecting our freedom. Let us not allow our freedom to be take away. I don't know about you, but freedom brings me great JOY and SECURITY!

**Just be Happy and Have Fun ...
with Passion and Purpose!**
